PROCESS TEMPERATURE CONTROLLER MMULTISPAN PTC-4202

PV = Process value **SV** = Set Value

Display Color: Upper: White Or Red Lower: Green

TECHNICAL SPECIFICATION

INPUT SPECIFICATION:

Input Types	Input	Range
	J	0 to 600°C,
	K	0 to 1200°C,
	PT-100	-99 to 400°C,
	PT.1	-99.0 to 400.0°C,
	0-10V DC	-999 to 9999
	0-20mA DC	-999 to 9999
	4-20mA DC	-999 to 9999
Resolution	J,K,PT-100 = 1°C	
	PT.1 = 0.1°C	
	0-10V DC,0-20mA DC,4-20mA DC = 0.1,0.01,0.001,0001	
Indication	±1% of FSD ± 1°C	
Accuracy	(FSD:- full scale deflection)	

DISPLAY AND KEYS:

Display	Upper: 4 digit, 7 segment, 0.56"	
	Lower: 4 digit, 7 segment, 0.33"	
Keys	SET, INC, DEC, ENT	

DIMENSION:

Size	52 (H) x 52 (W) x 111 (D) mm
Panel Cutout	45 (H) x 45 (W) mm

CONTROL METHOD:

Heating	1) PID control with Auto-Tuning
	2) ON-OFF control
Cooling	1) BL.TP (Blower Time Proportion) 2) ON-OFF control
Alarm	High/ Absolute Low/ Inband/ Absolute Outband

OUTPUT SPECIFICATION

Relay Output	
Relay	2 nos.
Relay Type	1 C/O (NO-C)
Rating	5A, 230V AC/30 V DC
Transmitter supply	24V DC

AUXILIARY SUPPLY

Supply voltage	100 to 270V AC, 50-60Hz
Power consumption (VA RATING)	Approx 7 VA @ 230V AC MAX

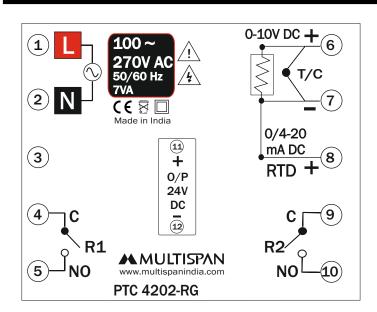

ENVIRONMENT CONDITION

Operating Temp.	0°C to 55°C
Relative Humidity	UP to 95% RH (non-condensing)
Protection Level	IP-65 (Front side) As per IS/IEC 60529 : 2001

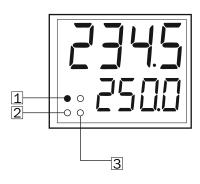

MECHANICAL INSTALLATION

Outline Dimension (mm)	Panel Cutout Dimension (mm
3 111 111 111	45

TERMINAL CONNECTION

STATUS LED DESCRIPTION

- 1 Output 1
- 3 Auto tuning
- 2 Output 2

KEY OPERATION

FUNCTION	PRESS KEY	
OPERATOR MODE		
To enter in parameter setting	SET	
For start/stop PID auto tuning	Press 6 sec	
To go in factory setting mode	Press 3 sec	
PARAMETER SETTING MODE		
To set parameter value	SET	
To increment parameter value.	\triangle	
To decrement parameter value.	\bigcirc	
Set parameter to be save & exit.	ENT	

INSTALLATION GUIDELINES

- 1. This equipment, being built-in-type, normally becomes a part of main control panel and in such case the terminals do not remain accessible to the end user after installation and internal wiring.
- 2. Do not allow pieces of metal, wire clippings, or fine metallic fillings from installation to enter the product or else it may lead to a safety hazard that may in turn endanger life or cause electrical shock to the operator.
- 3. Circuit breaker or mains switch must be installed between power source and supply terminal to facilitate power 'ON' or 'OFF' function. However this mains switch or circuit breaker must be installed at convenient place normally accessible to the operator.
- 4. Use and store the instrument within the specified ambient temperature and humidity ranges as mentioned in this manual.

MECHANICAL INSTALLATION GUIDELINES

- 1. Prepare the panel cutout with proper dimensions as shown above.
- 2. Fit the unit into the panel with the help of clamp given.
- 3. The equipment in its installed state must not come in close proximity to any heating source, caustic vapors, oils steam, or other unwanted process byproducts.
- 4. Use the specified size of crimp terminal (M3.5 screws) to wire the terminal block. Tightening the screws on the terminal block using the tightening torque of the range of 1.2 N.m.
- 5. Do not connect anything to unused terminals.

MAINTENANCE

- 1. The equipment should be cleaned regularly to avoid blockage of ventilating parts.
- 2. Clean the equipment with a clean soft cloth. Do not use isopropyl alcohol or any other cleaning agent.
- 3. Fusible resistor must not be replaced by operator.

SAFETY PRECAUTION

All safety related codifications, symbols and instructions that appear in this operating manual or on the equipment must be strictly followed to ensure the safety of the operating personnel as well as the instrument.

If all the equipment is not handled in a manner specified by the manufacturer, it might impair the protection provided by the equipment.

Read complete instructions prior to installation and operation of the unit.

WARNING: Risk of electric shock.

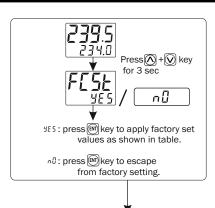

WARNING GUIDELINES

/ WARNING : Risk of electric shock.

- 1. To prevent the risk of electric shock, power supply to the equipment must be kept OFF while doing the wiring arrangement. Do not touch the terminals while power is being supplied.
- 2. To reduce electro magnetic interference, use wire with adequate rating and twists of the same of equal size shall be made with shortest connection.
- 3. Cable used for connection to power source, must have a cross section of 1mm or greater. These wires should have insulations capacity made of at least 1.5kV.
- 4. When extending the thermocouple lead wires, always use thermocouple compensation wires for wiring for the RTD type, use a wiring material with a small lead resistance $(5\Omega \text{ max per line})$ and no resistance differentials among three wires should be present.
- 5. A better anti-noise effect can be expected by using standard power supply cable for the instrument.

FACTORY SETTING

FACTORY SETTING		
SR.	PARAMETER	VALUES
1	PB	20.0° C

				DP 0	-999 to 999
16	FLTR		-	0.1 to 10.0 Sec	
17	SLL	-	-		0.0 to 5.0 mA

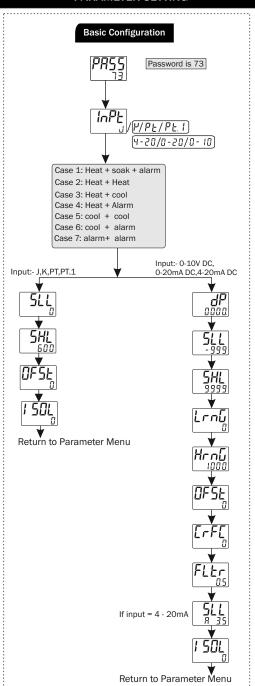

ERROR DISPLAY

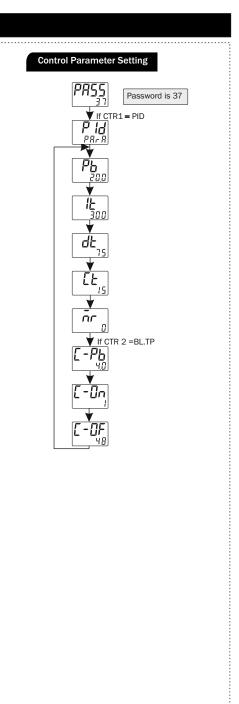

When an error has occurred the display indicates error codes as given below.

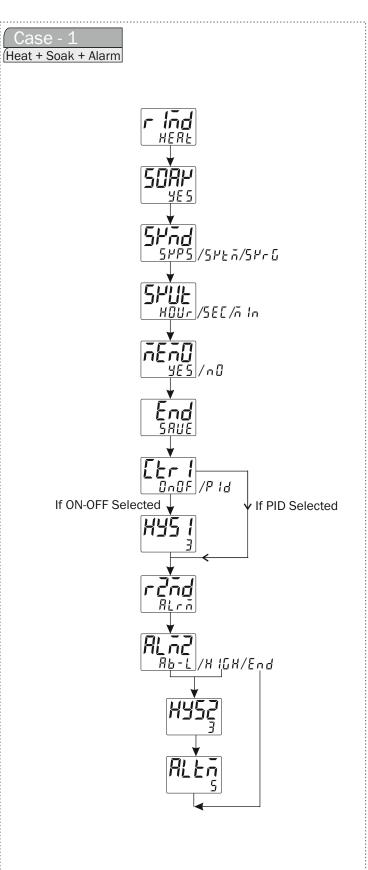

ERROR	MEANING	
OPEn	Sensor is not connected or Over range condition or sensor break	
5-E	Sensor connection is reversed	
OUEr	Over range condition For 0 to 10V DC - exceed 10V DC For 4 to 20mA DC - exceed 20mA DC	
LOū	When I/P is 4 to 20mA DC is selected, than I/P signal is lower than SLL (0-5mA)	

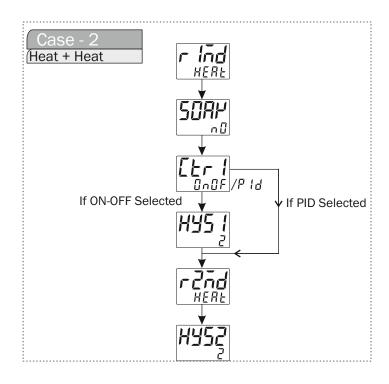

PARAMETER SETTING

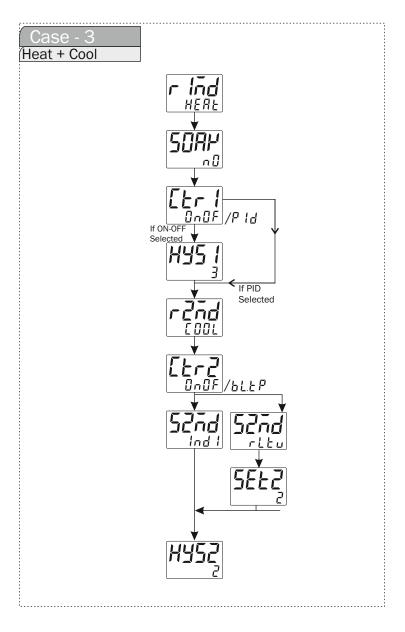

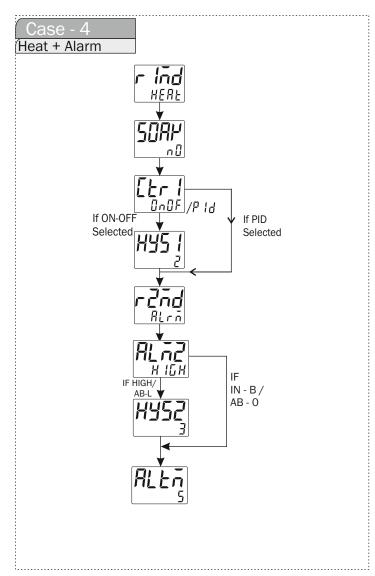

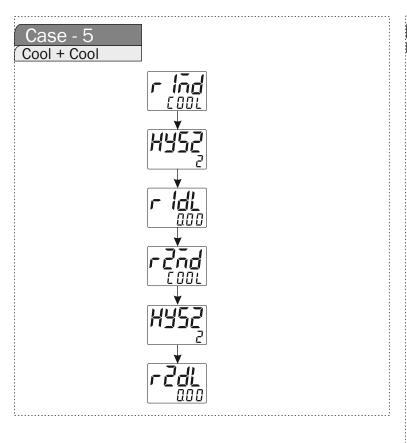

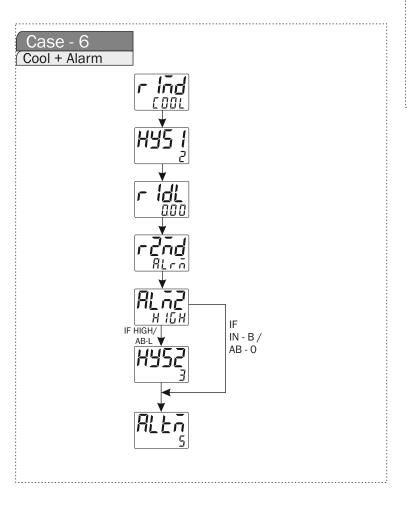

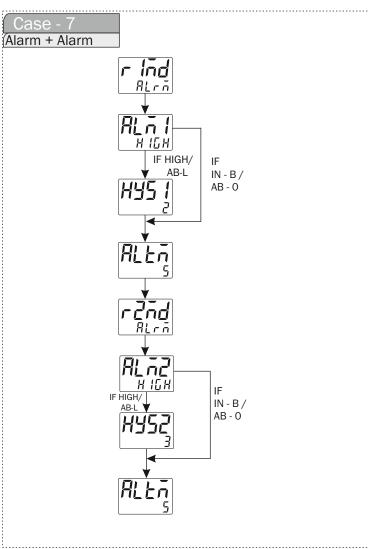

Specifications are subject to change, since development is a continuous process,
So for more updated operating information and Support,
